Crumb & Co: Mentor Review Pack and Feedback Log

Capstone 27, Step 5. Send this to a mentor or peer, then record what they say and what you change.

What to send

Send these four items in this order, so the reviewer sees the AI's claims next to what you found when you checked them.

1. Financial Outline: the AI's first draft of your plan.
2. Verification Report and Error Log: what you checked and what was wrong.
3. Real Price Tracker: the prices behind your checks.
4. The revenue model workbook (Bakery_Revenue_Model.xlsx), attached.

Share each doc so the reviewer can comment. Before you send, decide whether to apply the seven proposed changes in the tracker's update log to the model first, so the reviewer sees corrected numbers.

Questions for the reviewer

Keep it to these five, so a reviewer can answer in 15 to 20 minutes.

1. Are my cake prices realistic for Chennai, or would customers balk?
2. Is 30 orders a week believable for a solo home baker?
3. Which assumption worries you most?
4. What costs have I forgotten (your own time, spoilage, delivery fees, platform fees)?
5. Would you trust this plan enough to put money behind it? What would change your mind?

Message to a mentor (email)

Subject: Could you review my AI-assisted business plan draft? (about 20 minutes)

Hi [Name],

I'm working on a capstone project that tests whether AI can draft a business plan and which parts are most likely to be wrong. My fictional business is Crumb & Co, a home bakery in Chennai selling eggless cakes, brownie boxes, cookie boxes and gift hampers.

I used AI to draft the plan, then checked every number against real sources. I'd value 20 minutes of your time to review it and tell me where my judgment is off.

What to look at:

1. Financial Outline (the AI's first draft): https://claude.ai/artifact/AHym4cf8eHvQwdHuGcaG8c
2. Verification Report and Error Log: https://claude.ai/artifact/FVtirt4J4Wn1L6pWtaeQ69
3. Real Price Tracker: https://claude.ai/artifact/EpWPmwSStj2kY9SGtCMGx9
4. Revenue model workbook (attached)

Questions I'd like your view on:

1. Are my cake prices realistic for Chennai?
2. Is 30 orders a week believable for a solo home baker?
3. Which assumption worries you most?
4. What costs have I forgotten?
5. Would you trust this plan enough to back it? What would change your mind?

A short reply, a call, or comments in the documents would all work. I'm hoping to finish my revisions by [date].

Thank you, [Your name]

Message to a peer (WhatsApp)

Hi [Name], I'm doing a capstone on whether AI can write a business plan (mine is a home bakery in Chennai, Crumb & Co). Could you spend 15 minutes poking holes in it? Main thing I want to know: do the prices and the 30 orders a week look believable, and what costs did I miss?

Plan: https://claude.ai/artifact/AHym4cf8eHvQwdHuGcaG8c My error log: https://claude.ai/artifact/FVtirt4J4Wn1L6pWtaeQ69

Honest feedback please, even if it's harsh. Thanks!

Feedback log

Record every piece of feedback, including the ones you reject. Rejected feedback with a reason shows you used judgment instead of just agreeing.

Date	Reviewer	Section	Feedback	Accept or reject, and why	Change made

After the review

1. Group the feedback by theme (pricing, volume, missing costs, other).
2. Apply the accepted changes to the revenue model and the plan, and note each one in the log above.
3. Keep the first AI draft unedited. You will compare it with your final version in Step 8.
